Main photo of Gulliver parasol designed by Davy Grosemanes. During his many travels, Gulliver ends up in strange and wonderful places, where things either seem too big or too small. This parasol appears to come from one of those places. It is nothing more, nothing less than a larger than life umbrella. By using waterproof fabrics, it can be used during sunny or rainy days. It also creates an ideal smoking point outside bars and cafés. www.sywawa.com
